With much pleasure I am submitting a brief report on various activities/ events/celebrations and achievements of this special Home during the year 2016. In this Home various activities were conducted based on the Action Plan. In the beginning of the academic year we conducted medical checkup all the boys and necessary follow up will be done. The children are hale and healthy. The following activities are conducted towards the development of children.

In order to develop their leadership quality we elect leaders among the Boys every month and assign specific duties to them. Under the leaders, a group of boys will be there to carry out the set task. The leaders have to monitor the work and report to the Child Care Worker. We call this system as 'Self government'. This assignment will be given to all boys. Boys carry out the works with much interest and they develop slowly their leadership quality.

Academic performances of the boys are closely monitored by the Child Care Workers. Necessary educational accessories would be given to the boys in the beginning of the academic year itself. They have regular study hours; small tests; meeting the teachers; tuitions for the poor academic performers; informing the parents about their academic performance are the routine work of the Child Care worker.
